Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 32 and 47 are allowable over the prior art of record by claiming a system and method for detecting a light signal or imaging an object or target undergoing vibration. The prior art does not disclose nor obviate a system or method that includes an array of light amplitude modulation detectors or an array of photodetectors, with each detector in the array configured to receive a light signal from a corresponding region of the target object and to generate an output. The received output signals are filtered or correlated to a vibration of the corresponding region of the target object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT
